

Virus X Human

Exhibition on Art and Science at Stiftungshaus Bremen

The collaborative format "Visionskultur X Stiftungshaus" connects creative projects of Visionskultur, and the Creative Hub Bremen with the foundation community of Stiftungshaus Bremen.

"Virus X Human – Art X Science" exhibits results of a collaboration among artist Heike Seyffarth and Professor Sebastian Springer, head of the Molecular Immunology group at Constructor University Bremen. Their virus research is supported by the Tönjes-Vagt Foundation via Stiftungshaus Bremen.

Various research topics will illustrate the beauty and impressive functionality of viruses, supplemented by information on targeted research. Artistic interpretations and visualizations bridge the gap among science and art, rounding off the exhibition.

We cordially invite you to join the opening on Friday, November 22, 2024, at 6:00 PM.

Following an introduction to the exhibition, three thematically relevant projects of Visionskultur will be presented. Afterwards, there will be time for informal networking.

Exhibition at Stiftungshaus Bremen, November 22, 2024 – February 28, 2025

Opening hours by appointment at 0421 1653550

Stiftungshaus Bremen, Bürgermeister-Smidt-Straße 78, 28195 Bremen

Special thanks to the Tönjes-Vagt Foundation for their kind support!
